2013 DATA OUTCOMES:

SCHOOL PERFORMANCE:
Staff and School Council have been briefed on our most recent data for our school - Parent Opinion Survey, Student’s ‘Attitudes to School’ and NAPLAN.

We are all feeling extremely proud of our efforts and performance and believe it is extremely important to share the good news with our community.

NAPLAN:
Let us start with NAPLAN - The data that has the best representation of a school’s performance is the ‘Matched Cohort’ data set. What does this mean or represent? A ‘matched cohort’ is the group of students who were tested in grade three; two years ago, have remained at ANPS and were tested again in grade 5. We know that if your children remain with us and are exposed to the high level of teaching and learning that we provide, they will improve dramatically. Our data set on matched cohort proves this beyond doubt.

We have equalled or bettered the State growth in all areas. 47% greater than the State in grammar and punctuation, 30% better in reading, 27% better in spelling, and 6% better in writing.

These are amazing results. Our programs and structures are certainly working!

PARENT OPINION:
The excellent news continues with parent opinions of our school at record high levels. We are in the top 10% in the State for ‘reporting to parents’. We are in the top 25% in the State on: School improvement, approachability, teacher morale, parent input, stimulating learning, behaviour management, transitions, extra curricula, homework, general satisfaction, classroom behaviour and student motivation.

We would like to thank our parent community for their incredibly strong support.

STUDENT - “Attitudes to School”:
For Teaching and Learning areas of: Learning confidence, student motivation, school connectedness, teacher effectiveness, stimulating learning and teacher empathy, our students rate our school at or above the state level. Another amazing result for ANPS.

We have worked extremely hard as a staff and community team to achieve these outstanding results and everyone is to be commended. The challenge is to now continue to grow our performance.
